ALTERATIONS IN PLACE NAMES

The strong feeling of Nationalism engendered during the Great War and the creation of new States by the Versailles and other Treaties have led to the re-naming of many places, particularly in Central Europe, Russia, and the Near East.

This is bound to cause a certain amount of confusion until the new forms come into popular use, and upon the maps which follow, in many cases both styles are given. The greatest changes of all have probably taken place in areas which once formed part of Austria-Hungary.

Thus, Czechoslovakia (itself a post-war creation) has substituted Praha for Prague, Brno for

Brünn, Yugoslavia (sometimes spelt Jugoslavia) has changed Agram to Zagreb, Spalato to Split, and so on.

The same thing has happened in Rumania and to a smaller extent in Hungary, while the new Turkey has re-named Constantinople as Istanbul, Smyrna as Izmir, and Adrianople as Edirne. Russia has aimed at obliterating all traces upon the map of the Czarist regime (Leningrad for Petrograd and Sverdlovsk for Yekaterinburg are examples), and the new Baltic States also have introduced important changes, while Ireland has recently adopted the same course nearer home.

LIST OF ABBREVIATIONS TO THE GAZETTEER INDEX

Note—There have recently been changes in the form and place names particularly in Central and Eastern Europe. The index agreement with the maps where the form is for the use of the present day is shown in the list of place names.

Sea Transport

-  Communication by Sea throughout the Year
 Seas closed to navigation for the whole or part of the Year by Ice
 Principal Channels of Overseas Trade open throughout the Year
 do closed by ice part of the Year
 Submarine Cables
 Functional Limits of Icebergs

Land Transport

The map shows the world's land transport routes, including the major land routes and the functional limits of icebergs. The map also shows the major land routes and the functional limits of icebergs.

The map shows the world's land transport routes, including the major land routes and the functional limits of icebergs. The map also shows the major land routes and the functional limits of icebergs.

TRANSPORT

Comparative lengths of the chief routes round the world

Route	By rail	By sea
LONDON to NEW YORK	3,450 miles	3,000 miles
LONDON to SYDNEY	11,000 miles	10,000 miles
LONDON to ADELAIDE	11,000 miles	10,000 miles
LONDON to AUCKLAND	11,000 miles	10,000 miles
LONDON to DUNEDIN	11,000 miles	10,000 miles
LONDON to SYDNEY	11,000 miles	10,000 miles
LONDON to ADELAIDE	11,000 miles	10,000 miles
LONDON to AUCKLAND	11,000 miles	10,000 miles
LONDON to DUNEDIN	11,000 miles	10,000 miles

The map as shown is modified to show the chief routes round the world. The map is a reproduction of a portion of which the land masses are shown in white and the sea in blue.

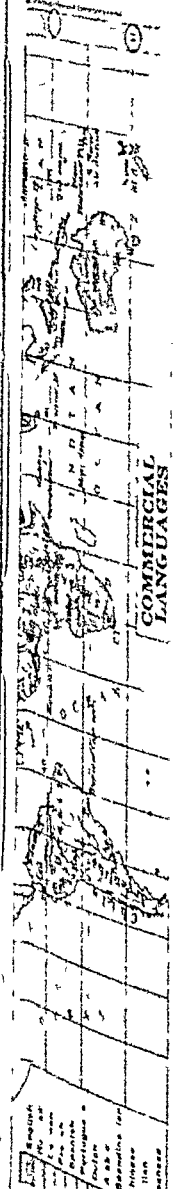

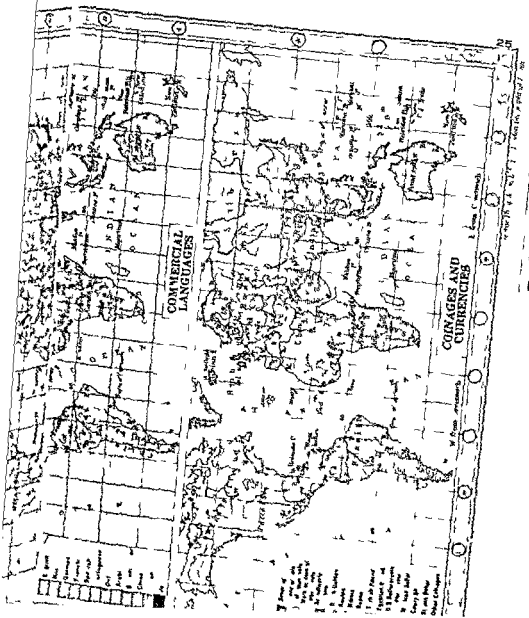

Commercially Developed Regions

	Principal Sea Fisheries		Agriculture
	Pearl Fisheries		Lumbering (including timber etc.)
	Sheep Raising (Mainly Sheep)		Intensive Agriculture (Horticulture)
	Cattle Raising (Cattle and Mixed Farming)		Manufacture and Mining

OCCUPATIONS V

LEAGUE OF NATIONS

Permanent Members of the League Council

- British Empire and all dependencies
- British India (including all India, Ceylon, and other territories)
- France and her possessions
- Germany
- Italy and her possessions
- Japan
- Other Members of the League
- States outside the League

Mandated Territories

British in place of the League
